Sizzling Summer Trends!

Blondes are back! Browns are rich! Reds are hot!

Hair color options are heating up as we head toward summer. Full-coverage platinum or blond on blond tones are back on top. Dark rich browns are infused with shades of caramel for a light detail accent. Dark rich blue reds, with shades of detailed auburn, create a contrast between light and dark. Take the plunge and look hot this summer.

Short pixie cuts with lots of fringe are in. Bobs are back, chin length or longer, accented with fringe detail around the perimeter of the face. And don't forget the curlers! Embrace your inner Marilyn (Monroe not Manson) with curls for evening galas or glamorous shopping adventures.

Let's not forget your wardrobe. The choices are abundant with color. Green and yellow are the "it" colors this summer, although the fashion experts are still wild about snake skin and animal prints. Gold jewelry makes its comeback. Gold and silver together makes a statement. Our own expert advice—wear whatever makes you look sizzling hot in the heat of the summer.

Tips from Tasha

Tasha recommends **jbeverlyhills' Fragile—color safe shampoo** and **Masque—hair and scalp intensive treatment**. When she used these products, Tasha saw instant results. Her dry, brittle hair was soft and healthy looking for the first time in ages.

Fragile—color safe shampoo—nourishes dry, color/chemically treated, over-stressed hair. Its gentle formula utilizes the safest cleaners to protect and prolong treated hair.

Masque—hair and scalp treatment—replenishes, restores, and detangles each hair strand with moisture to balance the scalp.
