

## Apprentice

After graduating from Cosmetology school, Tangi's Salon offers a program designed to train an entry level graduate in the art of great hair design. The Apprentice Training Program includes: Hair Cutting Techniques; Advanced Hair Color Methods; current trends in Permanent Waves; Straightening Techniques; and Special Occasion Hair. During the Apprentice Level training period, the trainee is able to provide clients with all hair design services, with the assistance of a Level 3 Master.

## Young Master

Once the Apprentice graduates from their training program, she/he is promoted to a Young Master. At this stage, the Young Master accepts appointments on their own, with guidance from upper level Masters. Tangi's Salon Hair Design team makes suggestions and offers creative ideas to assist the Young Master in developing her/his craft.

## Master Level 1

Upon completion of the Young Master program, the Hair Designer is elevated to a Master Level 1. Their commitment to learning, desire to achieve, and ability to provide good customer service are qualities of the level of mastery achieved.

## Master Level 2

At this level, the Hair Designer is experienced and extensively trained. A level 2 Master actively participates in the education of other Hair Designers. Their experience includes educating clients and peers outside the salon environment, and often working as part-time educators for industry manufacturers. As a part of their continuing education, level 2 Masters are required to participate in off-site, advanced education seminars 4 times per year.

## Master Level 3

With years of experience and valuable industry knowledge, a Master Level 3 continuously sharpens their skills and enjoys training others to reach their potential in the craft of Hair Design at Tang's Salon. They are true masters in all areas of hair design.
